Evaluation Kit of APC200 Contact Smart Card Door Lock

1.0 System Requirements

This kit will require the following system specifications:

- IBM compatible Personal Computer with Intel Pentium III 500 MHz Processor or higher;
- Minimum 128MB RAM;
- Microsoft Windows 2000/XP;
- CD-ROM Drive;
- One available USB port.

2.0 EVK checklist

The APC200 EVK contains the following:

- 1 unit of Contact Smart Card Door Lock mounted in wood;
- 1 unit of Smart Card Issuing Machine;
- 2 units of Back-up Mechanical Keys;
- 15 pieces of User Cards (SLE5542);
- 2 pieces of Data Collection Cards (AT24C16);
- 1 EVK CD ROM.

3.0 Install EVK Components

Insert the APC200 EVK CD into your CDRom drive. Run **IC-NK-EN 3.1.exe** (or version higher than 3.1) to install Hotel Management Software (IC-NK system) and IC Lock Records Software to your computer.

- **Hotel Management Software**— Program that allows you to issue, edit and manage the IC cards for the door locks.
- **IC Lock Records Software** — Program that allows you to retrieve data from the IC cards.

The EVK also includes:

- **User Manuals and Reference Materials** — These files are in PDF. You can install the Acrobat Reader to read them.
 - **Hotel Management Software Manual** — Manual for how to use the hotel management software.
 - **IC Lock Records Software Manual** — Manual for how to use the IC lock records software.
 - **APC200 Installation Manual** — Manual for how to install APC 200 Contact Smart Card door lock to a wooden door.
